

Sterility Maintenance Bags

Storing and transporting components poststerilization can be a challenge. Incorporating sterility maintenance bags is a practical and cost effective way to ensure sterility is maintained for your critical parts. Whether moving from different classified areas or just sitting on a shelf, sterility maintenance bags add another layer of assurance for your most critical components.

Why Choose **STERIS** Sterility Maintenance Bags

Provides extra layer of protection for storage and transport

Reduces risk of contamination

Facilitates aggressive and effective surface sanitization

Simplifies transport of components between classified areas

Can be incorporated with minimal qualification/validation

Economic alternative to HEPA filtration cart

Convenient self-sealing closure

Puncture resistant medical grade film

Notched for clean, easy tear opening

No additional tools required to seal or open

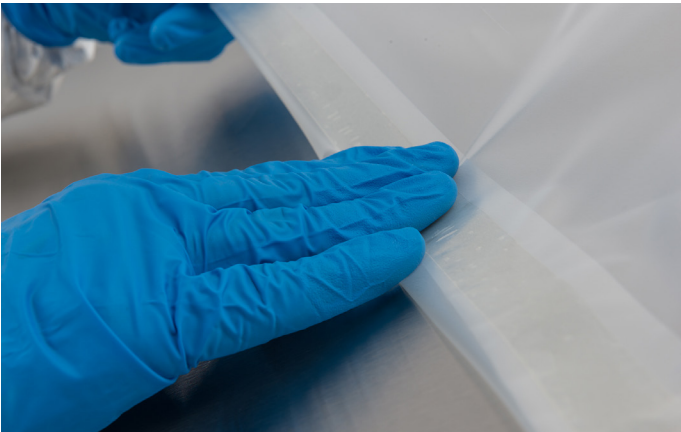

Developed to provide an added layer of protection for storage and transportation of your components.
